<p>Panel Discussion- Taking Resilience Agenda Forward ACCCRN offers a lot of insight to the way climate resilience could be approached in urban centers in Asia. There are other concepts and approaches that exist in parallel and have potential to be applied, tested and adopted by cities. The governments across many countries are preparing their own agenda for addressing climate related issues and there is scope for mutual learning amongst organizations, cities and institutions. The panel discusses on how to best utilize the present experiences and how to build on the experiences so far to help cities to become climate resilient, sustainable entities.
